this 1988 volume examines the agrarian history of england and wales from edward the confessor to the outbreak of the black death in 1348

this book provides a detailed account of each law officer s functions and draws on that account as the basis for a conceptual analysis of their constitutional legitimacy in recent years the constitutional legitimacy of law officers has been questioned repeatedly because of recurring controversies surrounding the discharge of their varied functions indeed it has become increasingly clear that those functions enable law officers to play a highly influential part in the regulation and exercise of public power throughout the united kingdom mccormick argues that the most persuasive framework for analysing the offices which make up this diverse regime involves concentrating on the constitutional values of independence accountability and trust which underpin it both aspects of the book namely the explanation of individual functions and the conceptual analysis of collective legitimacy are written in a holistic way which encompasses critical analyses about the attorney general and solicitor general for england and wales the counsel general for wales the lord advocate solicitor general and advocate general for scotland as well as the attorney general and advocate general for northern ireland

the unifying theme of this volume is the changing role of the countryside in national life and the impact upon it of the social and economic forces unleashed by industrialisation and the growth of towns
