the encyclopaedia fills a gap in both the history of science and in cultural studies reference works on other cultures tend either to omit science completely or pay little attention to it and those on the history of science almost always start with the Greeks with perhaps a mention of the Islamic world as a translator of Greek scientific works the purpose of the encyclopaedia is to bring together

knowledge of many disparate fields in one place and to legitimize the study of other cultures science our aim is not to claim the superiority of other cultures but to engage in a mutual exchange of ideas the western academic divisions of science technology and medicine have been united in the encyclopaedia because in ancient cultures these disciplines were connected this work contributes to redressing the balance in the number of reference works devoted to the study of western science and encourages awareness of cultural diversity the encyclopaedia is the first compilation of this sort and it is testimony both to the earlier eurocentric view of academia as well as to the widened vision of today there is nothing that crosses disciplinary and geographic boundaries dealing with both scientific and philosophical issues to the extent that this work does xi personal note from the editor many years ago i taught african history at a secondary school in central africa

written by the founders of the new and expanding field of numerical algebraic geometry this is the first book that uses an algebraic geometric approach to the numerical solution of polynomial systems and also the first one to treat numerical methods for finding positive dimensional solution sets the text covers the full theory from methods developed for isolated solutions in the 1980 s to the most recent research on positive dimensional sets
