Qatar's sizable oil and natural gas reserves have underpinned its rapid economic growth over the past two decades. Home to the world's largest non-associated gas field, the country is the world's fourth largest producer of dry natural gas and the largest producer of liquefied natural gas, with hydrocarbons revenues forming the bulk of national income. As a result, although the drop in global energy prices has impacted export revenues, rigorous economic diversification drives in recent years have paid dividends. In 2015, non-hydrocarbons growth reached 7.7% compared to a 0.1% contraction for hydrocarbons growth during the same period. The country's financial sector has continued to evolve; Islamic banking, in particular, has witnessed significant progress. Meanwhile, as the country gears up to host several important sporting events in the coming years, most notably the 2022 FIFA World Cup, numerous big-ticket infrastructure builds continue to expand the construction sector.

This edition of the U.S. Geological Survey's *USGS Minerals Yearbook* discusses the performance of the worldwide minerals and materials industries during year 2013 and provides background information to assist in interpreting that performance. These annual reviews are designed to provide timely statistical data on mineral commodities in various countries. This volume covers data from Asia and the Pacific. Each report includes sections on government policies and programs, environmental issues, trade and production data, industry structure and ownership, commodity sector developments, infrastructure, and a summary outlook. Audience: Government employees and contractors, as well as businesses and employees all working in mineral-related trades. Especially with interests in statistics about mineral commodities, overseas will find this resource invaluable.

This book critically engages with the concepts of small states and soft power and advances a new approach to defining small states, a new conceptualisation of soft power, and a method for empirically analysing the exercise of soft power. It revisits the concepts of small states and soft power with a focus on Bhutan and Qatar and their approach to exercise soft power to achieve their foreign policy goals. Building on two main perspectives to define small states, the objective approach and the subjective perspective, this book offers an intersubjective approach to define states as small. The intersubjective approach requires a shared understanding between states that a certain state is small. The book further highlights the importance of deconstructing the meaning of size and to separate the notion of size from the concept of power because size is not always indicative of power. It argues that although small states tend to have fewer material resources

than large states they nevertheless can have influence through the exercise of soft power soft power is in this book defined as the ability of an actor to convince another actor that something is true convincing deals with the beliefs of an actor and is a mental decision rather than a physical action this book argues that the exercise of soft power can be analysed through examining the development projection and reception of identities the findings of this book show that bhutan was more successful than qatar in exercising soft power and explains the reasons for this variation aimed at a multidisciplinary audience this book will be of particular interest to practitioners scholars and students of international relations political power small states and area studies

presenting the current debate about cities in the middle east from sana a beirut and jerusalem to cairo marrakesh and gaza the book explores urban planning and policy migration gender and identity as well as politics and economics of urban settings in the region this handbook moves beyond essentialist and reductive analyses of identity urban politics planning and development in cities in the middle east and instead offers critical engagement with both historical and contemporary urban processes in the region approaching cities as multi dimensional sites products of political processes knowledge production and exchange and local and global visions as well as spatial artefacts importantly in the different case studies and theoretical approaches there is no attempt to idealise urban politics planning and everyday life in the middle east which as with many other cities elsewhere are also situations of contestation and violence but rather to highlight how cities in the region and especially those which are understudied revolve around issues of housing infrastructure participation and identity amongst other concerns analysing a variety of cities in the middle east the book is a significant contribution to middle east studies it is an essential resource for students and academics interested in geography regional and urban studies of the middle east
