why we enjoy works of art and how repetition plays a central part in the pleasure we receive  
leonard bernstein in his famous norton lectures extolled repetition saying that it gave poetry its musical qualities and that music theorists refusal to take it seriously did so at their peril  
play it again sam takes bernstein seriously in this book  
samuel jay keyser explores in detail the way repetition works in poetry music and painting he argues for example that the same cognitive function underlies both how poets write rhyme in metrical verse and the way songwriters like duke ellington and billy strayhorn satin doll and richard rodgers and lorenz hart my funny valentine construct their iconic melodies furthermore the repetition found in these tunes can also be found in such classical compositions as mozart s rondo alla turca and his

german dances as well as in galant music in general the author also looks at repetition in paintings like gustave caillebotte s rainy day in paris andy warhol s campbell s soup cans and jackson pollock s drip paintings finally the photography of lee friedlander roni horn and osmond giglia giglia s girls in the windows is one of the highest grossing photographs in history are all shown to be built on repetition in the form of visual rhyme the book ends with a cognitive conjecture on why repetition has been so prominent in the arts from the homeric epics through duke ellington and beyond artists have exploited repetition throughout the ages the reason why is straightforward the brain finds the detection of repetition innately pleasurable play it again sam offers experimental evidence to support this claim
