advances in mathematics education is a new and innovative book series published by springer that builds on the success and the rich history of zdm the international journal on mathematics education formerly known as zentralblatt für didaktik der mathematik one characteristic of zdm since its inception in 1969 has been the publication of themed issues that aim to bring the state of the art on central sub domains within mathematics education the published issues include a rich variety of topics and contributions that continue to be of relevance today the newly established monograph series aims to integrate synthesize and extend papers from previously published themed issues of importance today by orienting these issues towards the future state of the art the main idea is to move the field forward with a book series that looks to the future by building on the past by carefully choosing viable ideas that can fruitfully mutate and inspire the next generations taking inspiration from henri poincaré 1854 1912 who said to create consists precisely in not making useless combinations and in making those which are useful and which are only a small minority

a comprehensive systematic account of human development which is sensitive to the needs interests and ecologies of nonwestern cultures and individuals is provided in this unique

volume the importance and value of the sociocultural milieu in shaping the growth and development of children is emphasized and the author asserts throughout that children do not grow and develop according to the same patterns regardless of culture the author describes developmental psychology from the perspective of west africa demonstrating how the local ecology and the resulting cultural ideology lead to differing ways in which children are conceptualized and socialized and in turn how they develop while much of his case material is from

this six chapter book examines quine s effort in his naturalized epistemology to interface between philosophy and science by providing epistemological framework that is informed by and integrated with the results of empirical sciences like psychology and cognitive science quine s critics have questioned the possibility of such a descriptive project to account for epistemic normativity on the ground that a purely descriptive scientific approach cannot tell us how we should form beliefs the argument of the critics is that the project to naturalize epistemology might simply describe how beliefs are formed without providing any guidance on whether those beliefs are justified or true but among other insights the author argues that quine s naturalized epistemology can accommodate epistemic norms suggesting that it can help us understand how to achieve our epistemic goals and potentially rectify misconceptions about epistemic normativity in a descriptive discipline by studying how humans acquire knowledge we can potentially identify reliable methods for forming true beliefs and address sceptical challenges in this book dr ekun simplifies the discussion of quine s naturalized epistemology and the criticisms that it aroused in philosophy in general and epistemology in particular identifying the problem of normativity as the most debilitating of the objections he comes up with a contextual theory of epistemic normativity to show that epistemology can be naturalized without necessarily denying it of the normative content this he carefully employed to douse the tensions raised by the critics the book does not only enlighten the readers about the subject matter of philosophy but also takes the readers through some core areas of epistemology dr ekun painstakingly renders his views in a language that carefully breaks down to their simplest forms the epistemic registers which ordinarily would have harboured some epistemic technicalities and linguistic obscurantism he provides a very rich source for

epistemology and the problem of knowledge in this single volume the book has six chapters and a very rich bibliography to assist readers who may be interested in further research on the subjects that constitute the content of the book professor yunusa kehinde salami phd fpan mnal department of philosophy obafemi awolowo university ile ife nigeria

this book provides philosophers of science with new theoretical resources for making their own contributions to the scientific realism debate readers will encounter old and new arguments for and against scientific realism they will also be given useful tips for how to provide influential formulations of scientific realism and antirealism finally they will see how scientific realism relates to scientific progress scientific understanding mathematical realism and scientific practice

covers topics in philosophy psychology and scientific methods vols 31 include a bibliography of philosophy 1933

the united states has a hate problem in recent years hate speech has led not only to deep division in our politics but also to violence murder and even insurrection and yet established constitutional jurisprudence holds that all speech is protected as content neutral and that the proper democratic response to hateful expression is not regulation but more speech so how can ordinary citizens stand up to hate groups when the state will not in combating hate billie murray proposes an answer to this question as a participant in anti racist and anti fascist protests including demonstrations against the ku klux klan neo nazis and the westboro baptist church murray witnessed firsthand the limitations of the more speech approach as well as the combative tactics of anti fascist activists she argues that this latter group commonly known as antifa embodies a radically different strategy for combating hate one that explodes the myth of content neutrality and reveals hate speech to be a tactic of fascist organizing with very real highly anti democratic consequences drawing on communication theory and this on the ground experience murray presents a new strategy which she calls allied tactics rooted in the commitment to affirm support and even protect those who are the victims of hate speech engaging and sophisticated combating hate contends that there are concrete ways to fight hate speech from the front lines murray s urgent argument that we reconsider how to confront

and fight this blight on american life is essential reading for the current era

language and context breaks new ground in our understanding of the relationship between register genre and context leckie tarry argues convincingly and engagingly for a functional theory of language which specifies register in terms of contextual and linguistic features and which suggests a discursive relationship between the two moving beyond the limits of much of today s theory this accessible volume develops a theoretical understanding of the relationship between text context language function and linguistic form helen leckie tarry a specialist in the area of register and applied linguistics died in 1991 aged 49 although she had finished a large part of this work her notes and draft chapters have been extensively edited by professor david birch david birch is currently professor of communication and media studies at central queensland university australia and previously taught at murdoch university western australia and the national university of singapore
