paths to the divine an introduction to world religions expertly combines original writing and engaging primary source texts to familiarize students with the basic tenets of a variety of world religions beyond presenting foundational knowledge on religious traditions the volume

demonstrates how belief systems can shape both an individual's and a society's culture, worldviews, and sense of belonging. The book features distinct emphasis on the religious traditions of Asia, presenting readers with information on beliefs and practices that may be unfamiliar or new to them, expanding their understanding and appreciation of others' traditions. The book begins by introducing students to the basics of religion, including key concepts and features of religion, representations of the divine, and the connection between nature and religion in early traditions. Additional chapters provide students with valuable insight and enlightening readings on Jainism, Buddhism, Sikhism, Chinese Religion, Shinto, Zoroastrianism, Judaism, Christianity, and Islam. Throughout, key terms, contextual introductions, discussion questions, and suggestions for further reading are provided. Written to expand students' knowledge and understanding of global traditions, *Paths of the Divine* is an ideal text for introductory courses in humanities, theology, and world religions. David Hodges is an ordained minister and an associate professor of humanities at Grambling State University. He holds a Ph.D. in humanities with an emphasis in religious studies from Florida State University and a M.Div. in theology and theological studies from Asbury Theological Seminary.

*Regional Geology and Tectonics: Principles of Geologic Analysis*, 2nd edition, is the first in a three-volume series covering Phanerozoic regional geology and tectonics. The new edition provides updates to the first edition's detailed overview of geologic processes and includes new sections on plate tectonics, petroleum systems, and new methods of geological analysis. This book provides both professionals and students with the basic principles necessary to grasp the conceptual approaches to hydrocarbon exploration in a wide variety of geological settings. Globally, it discusses in detail the principles of regional geological analysis and the main geological and geophysical tools. It captures and identifies the tectonics of the world in detail through a series of unique geographic maps, allowing quick access to exact tectonic locations. It serves as the ideal introductory overview and complementary reference to the core concepts of regional geology and tectonics offered in volumes 2 and 3 in the series.

This book is a must-have for any serious racing sailor. Sir Ben Ainslie, four-time Olympic gold-winning sailor, and Paul Elvstrom, arguably the greatest Olympic sailor of all time, proving that understanding the rules is crucial to winning, he devised this unique approach to explaining them using bird's-eye diagrams. His detailed explanations are applied to myriad racing situations, each cross-referenced to relevant case studies provided by World Sailing. Formerly ISAF, included with the book are a set of plastic boats for use during protest hearings; they are transparent but coloured differently so can also be used with an overhead projector. This edition is completely revised to cover the new rules issued for 2021-24. It includes the full text of the latest rules with a handy quick reference guide highlighting the latest changes. There is also

a confidence building section on how to present your case in a protest and the back cover shows the signal flags for instant easy reference on the race course long established as the most accessible and most trusted guide to the racing rules paul elvstrom explains is a must have whether racing in a dinghy keelboat or large yacht it is the perfect pocket reference for those who want to win
