the 1896 1899 papers few of which were published in russell s lifetime concentrate primarily on physics arithmetic and the concept of quantity several views that later became well known in his the principles of mathematics actually originate in his earlier work and though incomplete an analysis of mathematical reasoning forms a centrepiece of the volume

first published in 1990 routledge is an imprint of taylor francis an informa company

thomas hurka presents the first full historical study of an important strand in the development of modern moral philosophy his subject is a series of british ethical theorists from the late nineteenth century to the mid twentieth century who shared key assumptions that made them a unified and distinctive school the best known of them are henry sidgwick g e moore and w d ross others include hastings rashdall h a prichard c d broad and a c ewing they disagreed on some important topics especially in normative ethics thus some were consequentialists and others deontologists sidgwick thought only pleasure is good while others emphasized perfectionist goods such as knowledge aesthetic appreciation and virtue but all were non naturalists and intuitionists in metaethics holding that moral judgements can be objectively true have a distinctive subject matter and are known by direct insight they also had similar views about how ethical theory should proceed and what are relevant arguments in it their disagreements therefore took place on common ground hurka recovers the history of this under appreciated group by showing what its members thought how they influenced each other and how their ideas changed through time he also identifies the shared assumptions that made their school unified and distinctive and assesses their contributions critically both when they debated each other and when they agreed one of his themes is that that their general approach to ethics was more fruitful philosophically than many better known ones of both earlier and later times

first multi year cumulation covers six years 1965 70

this book is the first to offer a structured process which enables public organisations and their communities to jointly develop performance indicators for the public organisation s operations enabling communities to determine performance indicators that are highly relevant and contextually useful

includes an unpaged appendix royal warrant holders and 19 a war honours supplement

what is money what is capital the spectre of capital tackles such fundamental questions at a deep philosophical level it argues that the modern world is ruled by a spectre the spectre of capital this insight is rooted in an original combination of the ideas of marx and hegel it presents the most sophisticated argument to date for the homology thesis namely that the order of hegel s logical categories and that of the social forms addressed by marx s capital share the same architectonic the systematic dialectical presentation shows how capital becomes a self sustaining power

research methods information systems and contexts second edition presents up to date guidance on how to teach research methods to graduate students and professionals working in information management information science librarianship archives and records and information systems it provides a coherent and precise account of current research themes and structures giving students guidance appreciation of the scope of research paradigms and the consequences of specific courses of action each of these
