as an industrial process construction is unique the procurement processes used to achieve the successful completion of built assets requires a different approach to that adopted in most other industries due to the design of buildings being bespoke and the sites being geographically varied the procurement process is central to the success of any construction project and many of

the problems which impact construction projects can be traced back to the procurement phase so a good understanding of the methods of procurement the development of a procurement strategy and the influence it has on project success is essential for all those working in the industry much has changed in the global construction industry since publication of the second edition of building procurement for example the increase in debt burden of many major economies widespread adoption of building information modelling bim technology in the industry and the united kingdom s exit from the european union this new edition has been rewritten to take account of these significant developments but at its core it continues to provide a critical examination and review of current procurement practices in the uk continental europe including eu procurement procedures china middle east and sub saharan africa and the usa it retains its original strong emphasis on the need for clients to establish achievable objectives which reflect the project business case and focuses on development of suitable strategies and management structures to meet those objectives in the current construction climate building procurement will be essential reading for senior undergraduate and postgraduate students of construction management and practitioners working in all areas of construction management

this book is an easy to read introduction to the principles and methods of building procurement and is aimed at first year students or non cognate graduates starting out on a career in construction property quantity surveying and construction management the book starts with a brief introduction to the construction industry including how the industry is organised into contractors consultants and clients after a discussion of the historical development of procurement methods which show a steady shift of risk and responsibility towards the supply side contractors the various roles and responsibilities which must be carried out in any project are discussed in detail the aim is to show the reader that procurement routes are effectively a permutation of these responsibilities between the various parties the book then explains the various methods by which the contractor s are paid either by pre negotiated lump sums or by some form of cost reimbursement variants of these two systems are also discussed several chapters are

given to the detailed discussion of the main procurement routes together with the appropriate standard forms of contract designed for that route more modern developments such as private financing and ppp are discussed and a chapter covering emerging trends in procurement completes the book containing discussion points chapter summaries and case studies this book is ideal for use in a variety of degree programs and courses across the built environment and engineering

first published in 2004 routledge is an imprint of taylor francis an informa company

gives clear practical advice and guidance on tools for use presented in a bright style with ample use of diagrams and case studies written for contractors consultants and clients well known and award winning author

evidence based assessment of new procurement processes in relation to collaborative working patterns weighing up the costs and benefits to the construction industry

procurement systems details the whole spectrum of procurement issues in the construction industry starting with the client customer and running through managerial cultural and it based issues the book commences with an overveiw of previous work and a section on selection criteria is provided to enable practitioners to make their choices of procurement form importantly perfromance comparisons of different procurement forms are discussed and the main emphasis of the book is to highlight best practice based on the most up to date research one chapter deals specifically with developmentally orientated procurement issues in nics newly industrialised countries where best practice is assessed from a different set of perspectives the authors contributing to this book are among the most highly respected and eminent in the field

this book aims to consolidate structure and articulate collective knowledge on construction project delivery procurement and contracting so that it can serve as a gateway to the contiguous topics of construction project delivery in addition to supporting the education of student

researchers as well as broadening and deepening the knowledge of practitioners the book is also intended to serve as a foundation for future education and as a reference book academicians can use it to benchmark and support their research and also as a textbook for an undergraduate or graduate course on the topics of project delivery procurement and contracting

the procurement of construction work is complex and a successful outcome frequently elusive clients have developed increased expectations of the industry and constructors and consultants are faced with far greater demands to achieve improvements in terms of value for money and quality in addition to seeking savings in cost and time this book provides a critical review of current practices in building procurement and evaluates new approaches particularly from the usa together with discussing the drivers for change in traditional uk procurement approaches it emphasises in particular the important need for clients to establish achievable objectives which reflect the client s business case for the project and then to develop a strategy and management structure to meet those objectives the book also examines procurement practices in europe including eu procurement procedures and in china and the usa it will be of interest to construction management postgraduates and researchers as well as construction practitioners
