of Scott Barker's Access 2002 Power Programming gives many practical techniques for the corporate and independent developer. The main topics covered are the root of power programming: manipulating and presenting data, extending access with interoperability, adding the professional look, and distributing applications. Managing databases, adding finishing touches, new features of Access 2002 will be covered thoroughly, including a whole new chapter devoted to data pages, which is Microsoft's way of bringing the interface into everyday office solutions. A new chapter clarifying the confusion over ADP, MDB, and DAO/ADO, including when and where to use each, there are a number of new additions to VBA which developers will need good exposure to in order to take advantage of them. A number of changes have been implemented in the form design with control features added.

Set your child up for a bright future with this new interactive activity book that helps kids decide which STEM (science, technology, engineering, and math) skills they most enjoy and where they most excel. How do batteries work? How exactly does a bridge stay up? How likely is it that someone shares your birthday? Kids are curious, and parents can help foster that curiosity and channel it into a passion for science, technology, engineering, and math. With What's Your STEM? This engaging activity book helps children learn about STEM with a variety of activities. Working together with their parents, they can figure out what interests them now and how it can lead to a career later on. In addition to the fifty entertaining and educational experiments, this interactive book includes information on potential STEM career paths. Families can work together to complete the activities, find out what everyone likes, and learn about jobs in those fields. What's Your STEM? is a fun, family-friendly way to expand kids' horizons and choose their own STEM adventure.
