leuphana universität lüneburg fakultät wirtschaftswissenschaften language english abstract this doctoral thesis examines how  
european merger control law is applied to the energy sector and to which extent its application may facilitate the liberalisation of the  
electricity natural gas and petroleum industries so that only those concentrations will be cleared that honour the principles of the  
liberalisation directives in 2007 the commission emphasized that a real internal european energy market is essential to meet europe  
s three energy objectives these were for example competitiveness to cut costs for citizens and undertakings to foster energy

germany through demarcation and exclusive concession agreements for the supply of electricity and natural gas which were until  
1998 exempted from the cartel prohibition provision and the prevalence of exclusive rights on the energy markets the commission  
triggered infringement proceedings against four member states the cjeu confirmed that the commission has the power to abolish  
monopoly rights under certain circumstances and the rulings had the effect of convincing the member states to enter into  
negotiations for an opening up of energy markets owing to the internal market energy liberalization directives 1996 1998 2003 2009  
2019 the 2nd liberalisation package of 2003 brought a widening of market opening and acceleration of pace of market opening to a  
greater number of eligible customers and an increase in the provisions on management and legal unbundling the 3rd energy  
package of 2009 addressed ownership unbundling of key infrastructure ownership and energy wholesale and retail supply consisting  
of three regulations and two directives the 4th liberalization package inter alia consists of a new iemd2019 and igmd2019 and
