Henry George's *Progress and Poverty* sold more than 3 million copies by the time of its 50th anniversary in 1929, outselling all other works on economics. Yet today economics students can complete their courses without ever having heard of the author's name. This collection redresses this neglect by presenting a range of perspectives on Henry George's fertile ideas, which it is increasingly argued merit revisiting in terms of their capacity to contribute towards solutions to current problems including runaway land values, nationalization of land, monopoly control of public assets and environmental degradation. The book also discusses George's significant theoretical contributions, including the Henry George theorem named after him by two Nobel prize winning economists, and important insights bearing on the relation of evolutionary theory to economics. The authors also discuss George's powerful influence on the economic development of Australia and New Zealand, and the affinity he felt for these countries is also considered. Henry George's legacy in economic thought will appeal in particular to upper level students and scholars of the history of economic thought and the public sector, but also to economists more widely.

From Heidi Neck, one of the most influential thinkers in entrepreneurship education today, Chris Neck, an award winning professor, and Emma Murray, business consultant and author, comes this ground breaking new text, *Entrepreneurship: The Practice and Mindset*. Catapults students beyond the classroom by helping them develop an entrepreneurial mindset so they can create opportunities and take action in uncertain environments. Based on the world renowned Babson Entrepreneurship Program, this new text emphasizes practice and learning through action. Students learn entrepreneurship by taking small actions and interacting with stakeholders in order to get feedback, experiment and move ideas forward. Students walk away from this text with the entrepreneurial mindset, skillset and toolset that can be applied to startups as well as organizations of all kinds. Whether your students have backgrounds in business, liberal arts

engineering or the sciences this text will take them on a transformative journey
