the routledge handbook of argumentation theory offers 43 chapters written specifically for this volume by a team of leading international scholars that survey a wide spectrum of research on the nature purpose and promise of argument and the associated practice of argumentation each chapter provides a state of the art survey to help readers understand and engage with the field s main ideas and problems the book is split into two parts part i covers orienting approaches in argumentation studies part ii focuses on the main debates in argumentation theory the handbook illustrates how different disciplines contribute to argumentation theory integrating contributions from logic epistemology social psychology political science communication rhetoric and other fields this volume thus provides researchers and students with a picture of the diversity and depth to the work in argumentation theory today throughout it clarifies complex questions and methods in this evolving field of study and references at the end of chapters and a comprehensive index at the back of the book provide readers with central resources for further work in this important area of research

this book is a systematic exposition of argument dialectics ad despite its name argument dialectics is a logical approach to argumentation theory ad stands out among theories of argument because of three unusual features it is reasons based holistic and particularistic this implies

that ad conceives of logic as a theory of the dialectical construction of reasons not as a theory of inferences consequently contrary to other logical approaches ad focuses on the study of inter argumentative relations especially those of opposition and weighing the book makes an extensive use of the theory of reasons a branch of metaethics that has been a very valuable quarry of intuitions and concepts for the elaboration of a reason based theory of argument the oppositions generalism particularism and atomism holism proposed by jonathan dancy which play a central role in the book and in the development of ad have been adapted from the theory of reasons and the same can be said of the distinction between different statuses of reasons that ad associates with different kinds of counterarguments conceiving of the theory of argument in terms of reasons has the effect of situating the paradigm of argumentation in practical argumentation reasoning about what to do rather than in theoretical argumentation about what to believe as inference based theories do hence this book is of interest to argumentation theorists communication theorists epistemologists linguists moral philosophers and philosophers of law

the present volume assembles a relevant set of studies of argument by analogy which address this topic in a systematic fashion either from an essentially theoretical perspective or from the perspective of it being applied to different fields like politics linguistics literature law medicine science in general and philosophy all result from original research conducted by their authors for this publication thus broadly speaking this is an exception which we find worthy of occupying a special place in the sphere of the bibliography on the argument by analogy in effect most of the contexts of the publications on this topic focus on specific areas for example everyday discourse science or law theory while underestimating or sometimes even ignoring other interdisciplinary scopes as is the case of literature medicine or philosophy the idiosyncrasy of this volume is that the reader and the researcher may follow the development of different theoretical outlooks on argument by analogy while measuring the scope of its greater or lesser application to the aforementioned areas as a whole

this volume presents a selection of papers reflecting key theoretical issues in argumentation theory its six sections are devoted to specific themes including the analysis and evaluation of argumentation argument schemes and the contextual embedding of argumentation the section on general perspectives on argumentation discusses the trends of empiricalization contextualization and formalization offers

descriptions of the analytical and evaluative tools of informal logic and highlights selected principles that argumentation theorists do and do not agree upon in turn the section on linguistic approaches to argumentation focuses on the problem of distinguishing between explanation and argument while also elaborating on the role of verbal indicators of argument schemes all essays included in this volume point out notable recent developments in the study of argumentation

pairing a best selling argument text with a thematic reader everything s an argument with readings teaches students to analyze the arguments that surround them every day and to create their own the book starts with proven instructional content by composition luminaries andrea lunsford and john ruszkiewicz covering five core types of arguments revised based on feedback from its large and devoted community of users the seventh edition offers a new chapter on multimedia argument and more than 35 readings across perspectives and genres from academic essays and newspaper editorials to tweets and infographics

arguing is a fundamental human activity it is a process of making sense of the world and negotiating understandings with others arguing can be and often is healthy for both relationships and societies the values of the community are shaped through people sharing their opinions offering reasons in support of their beliefs and deliberating hollihan and baaske present techniques for effective analysis logical reasoning and socially constructive argumentation they illustrate their discussions of theory and practice with multiple engaging examples the book focuses on narrative argument as a story backed by evidence to evaluate courses of action or to resolve conflicts a chapter on visual argumentation highlights the power of visual elements in arguments effective arguing requires a sensitivity to the demands of different argumentative contexts readers will become familiar with the elements of argument essential for politics the law debate business and relationships narrative arguments are rational arguments learning about the narrative reasoning process helps us tell more convincing credible and compassionate stories and to become better critics of the stories we hear

this book presents reflections on the relationship between narratives and argumentative discourse it focuses on their functional and structural similarities or dissimilarities and offers diverse perspectives and conceptual tools for analyzing the narratives potential power for justification

explanation and persuasion divided into two sections the first part under the title narratives as sources of knowledge and argument includes five chapters addressing rather general theoretical and characteristically philosophical issues related to the argumentative analysis and understanding of narratives we may perceive here how scholars in argumentation theory have recently approached certain topics that have a close connection with mainstream discussions in epistemology and the cognitive sciences about the justificatory potential of narratives the second part entitled argumentative narratives in context brings us six more chapters that concentrate on either particular functions played by argumentatively oriented narratives or particular practices that may benefit from the use of special kinds of narratives here the focus is either on the detailed analysis of contextualized examples of narratives with argumentative qualities or on the careful understanding of the particular demands of certain well defined situated activities as diverse as scientific theorizing or war policing that may be satisfied by certain uses of narrative discourse

arguments figure in our everyday practices of giving reasons for example we use arguments to advance reasons to explain why we believe or

did something to justify our beliefs or actions to persuade others to do or to believe something and to advance reasons to worry or to fear that something is true this book is about our uses of arguments to advance their premises as reasons for believing their conclusions i e as reasons for believing that their conclusions are true what exactly is involved when you successfully use an argument to advance the premises as reasons for believing the conclusion philosopher matthew w mckee suggests there is more involved than one might think
