in today's competitive environment smart technologies are increasingly recognized as key enablers of corporate sustainability in this new context corporate management control systems integrate with the issues of smart technologies sustainability and inter and intra organizational collaboration as the driving elements of the firm of the future this book proposes a management control framework for today's firms it investigates the effectiveness of

traditional management control systems in today's competitive environment and identifies potential limitations that may hinder their ability to effectively monitor modern organizations furthermore the book explores whether these systems can be improved with complementary tools or if entirely new mechanisms are required the book argues the need to adopt a new approach to control and a different lens for evaluating the activity of guiding the achievement of corporate objectives paving the way for the conceptualization of a new management control system

the book pays attention to the tax treatment of transfer pricing in a single perspective of analysis since the most important principles the arm's length principle conditions that independent parties would share and the sale country are agreed worldwide they must be applied in the same way regardless of the economic sector or industry a country survey overlooks the most important issue of the fiscal problem that is the ability to project a unitary policy in compliance with the arm's length or with the sale country principle and that should be audited by one sole only theoretically existing tax authority the practical part and examples disclose how rules should have been applied how legal proceedings can arise arose regarding their application how they were decided if litigation truly occurred and finally the author's motivated opinion with special focus on which is the breaking point of a specific analysis the term breaking point is used to explain which can be the factual and or the interpretative change that is able to modify such analysis and thus the solution extract from the preface of prof reuven avi yonah this book is a must read for any serious student of the topic and an important contribution to understanding how the arm's length is applied today as well as to how it should be applied it is an invaluable contribution and should be read widely by both tax lawyers and accountants and by tax policy makers

in 2001 we gathered a group of researchers in nice france to focus discussion on performance measurement and management control following the success of that conference we held subsequent conferences in 2003 2005 2007 and 2009 this title contains some of the exemplary papers that were presented at the most recent conference

joey f george i was honored to be asked to open the vi conference of the italian chapter of the association for information systems itais held in olbia on the costa smeralda of sardinia italy in october 2009 over 90 research papers were presented over two days and over 120 people attended the conference each day five parallel sessions featured papers on diverse information systems topics session themes included information and knowledge management organizational change and impact of ict is quality metrics and impact e justice and ethics of information systems information systems development and design methodologies e services in public and private sectors innovation transfer of it research projects the strategic role of information systems accounting management and information systems human computer interaction and emerging issues in a globalized and interconnected world the majority of attendees were from italy which would be expected for a meeting of the italian chapter of ais however as much as 30 of participants came

from elsewhere from other parts of europe to be sure but also from as far away as nigeria mexico and australia that the conference was so decidedly international provides support for the 2009 conference theme achieving fusion in the interconnected world amid lively discussion and intellectual exchanges professional networks were extended well beyond the costa smeralda and new connections and friendships were made

an examination of patient classification systems in fifteen different countries throughout the world

this book examines the relationship between digital innovations on the one hand and accounting and management information systems on the other in particular it addresses topics including cloud computing data mining xbrl and digital platforms it presents an analysis of how new technologies can reshape accounting and management information systems enhancing their information potentialities and their ability to support decision making processes as well as several studies that reveal how managerial information needs can affect and reshape the adoption of digital technologies focusing on the four major aspects data management information system architecture external and internal reporting the book offers a valuable resource for cios cfo's and more generally for business managers as well as for researchers and scholars it is mainly based on a selection of the best papers original double blind reviewed contributions presented at the 2015 annual conference of the italian chapter of the association for information systems ais
