being concerned with representation this book is about an idea a concept a word it is
primarily a conceptual analysis not a historical study of the way in which representative
government has evolved nor yet an empirical investigation of the behavior of
contemporary representatives or the expectations voters have about them yet although
the book is about a word it is not about mere words not merely about words for the
social philosopher for the social scientist words are not mere they are the tools of his
trade and a vital part of his subject matter since human beings are not merely political
animals but also language using animals their behavior is shaped by their ideas what
they do and how they do it depends upon how they see themselves and their world
and this in turn depends upon the concepts through which they see learning what
representation means and learning how to represent are intimately connected but even
beyond this the social theorist sees the world through a network of concepts our words
define and delimit our world in important ways and this is particularly true of the world
of human and social things for a zoologist may capture a rare specimen and simply
observe it but who can capture an instance of representation or of power or of interest
such things too can be observed but the observation always presupposes at least a
rudimentary conception of what representation or power or interest is what counts as
representation where it leaves off and some other phenomenon begins questions about
what representation is or is like are not fully separable from the question of what
representation means this book approaches the former questions by way of the latter
