the particular scheme or system of magic advocated in the present work is to an extent sui generis but to an extent only it is rather the manner of its application which makes it unique in magic that is to say the science of the control of the secret forces of nature there have always been two great schools the one great in good the other in evil the former the magic of light the latter that of darkness the former usually depending on the knowledge and invocation of the angelic natures the latter on the method of evocation of the demonic races usually the former is termed white magic as opposed to the latter or black magic the invocation of angelic forces then is an idea common in works of magic as also are the ceremonies of pact with and submission to the evil spirits the system however taught in the present work is based on the following conception that the good spirits and angelic powers of light are superior in power to the fallen spirits of darkness that these latter as

a punishment have been condemned to the service of the initiates of the magic of light this idea is to be found also in the kôran or as it is frequently and perhaps more correctly written qûr an as a consequence of this doctrine all ordinary material effects and phenomena are produced by the labour of the evil spirits under the command usually of the good that consequently whenever the evil demons can escape from the control of the good there is no evil that they will not work by way of vengeance that therefore sooner than obey man they will try to make him their servant by inducing him to conclude pacts and agreements with them that to further this project they will use every means that offers to obsess him that in order to become an adept therefore and dominate them the greatest possible firmness of will purity of soul and intent and power of self control is necessary that this is only to be attained by self abnegation on every plane that man therefore is the middle nature and natural controller of the middle nature between the angels and the demons and that therefore to each man is attached naturally both a guardian angel and a malevolent demon and also certain spirits that may become familiars so that with him it rests to give the victory unto the which he will that therefore in order to control and make service of the lower and evil the knowledge of the higher and good is requisite

the book of the sacred magic of abramelin the mage is a 15th century grimoire or book of magic that includes instructions on how an individual can make contact with their holy guardian angel although the instructions may seem quite simple few have managed to complete the operation even the highly experienced occultist aleister crowley failed to do so over a six month period in 1977 ramsey dukes attempted this abramelin operation the challenge was to adapt the ritual to twentieth century conditions and the abramelin diaries is his record of the struggle and the outcome looking forward the book offers practical advice for anyone wanting to attempt this notorious operation themselves looking back the author comments on the operation s legacy what happened after how it changed and continues to impact him and his life is spiritual retirement still relevant today or is it just nostalgia for a simpler more meaningful lifestyle why does technological empowerment threaten our sense of purpose many intriguing questions are raised as we read of one man s struggle to shape a simple significant lifestyle routine from the chaos of normality

abramelin lunar ordeal merges the traditional abramelin sacred magic with the singular bornless one invocation to produce an ordeal that can be accomplished in seven weeks instead of six or eighteen months this unique and advanced magical grimoire offers personal transformation for the adherent a new method for a timeless ordeal macgregor mathers published a book that introduced the magical ordeal to the magicians of the 20th century that book was called the book of abramelin and contained an arduous preparation practice that lasted six months to manifest the holy guardian angel which instructed and guided the adherent the book contained many magical squares of notorious potency to use them the magician had to undergo many months of prayer meditation fasting purification abasement and a period of complete sequestration another version of this working recently published had the working last for eighteen months with three months of sequestration many magicians attempted this arduous task some succeeded and some failed this working was typically beyond the means and resources of your average magician this was the challenge to achieve the knowledge and conversation with their holy guardian angel however frater barrabbas took this challenge and used it to forge a

whole new magical ordeal he decided to base it on a lunar cycle instead of a solar cycle crafting an ordeal that could be accomplished in seven weeks with three days of sequestration thus making its performance more practical frater barrabbas sought to create a powerful series of magical workings to produce the promised transfiguration state and manifest one's holy guardian angel he used invocations of the four seraphim and cherubim in four weeks along with the element godhead to produce a holy tabernacle of godhead and angelic intelligence he chose a revised version of the bornless or headless one invocation rite of golden dawn fame as the apex he plumbed the greek magical papyri to extract three more rituals to add to the bornless rite these rituals and more he has written into a book including the diary entries where he performed this working back in 2009 to validate it this lore and instruction are encapsulated in abramelin lunar ordeal a unique and profound contribution to the art of ritual magic the sacred magic of abramelin is now available using a new concise paradigm

this remarkable grimoire was translated by s l m mathers from a 15th century french manuscript this text has had a huge influence on modern ceremonial magic and has been cited as a primary influence on aleister crowley abraham of würzburg a cabalist and scholar of magic describes a quest for the secret teachings which culminated in egypt where he encountered the magician abramelin who taught him his system in detail the procedure involves many months of purification followed by the invocation of good and evil spirits to accomplish some very worldly goals including acquisition of treasure and love travel through the air and under water and raising armies out of thin air it also tells of raising the dead transforming ones appearance becoming invisible and starting storms the key to this is a set of remarkable magic squares sigils consisting of mystical words which in most cases can be read in several directions of course these diagrams are said to have no potency unless used in the appropriate ritual context by an initiate mathers analyzed these words in an extensive set of notes and gives possible derivations from hebrew greek and other languages

the book you hold in your hands the key of abramelin is designed to be the most powerful grimoire in history and you can decide if i have succeeded in that task the name of the book is to be understood

in many ways first this book is a key to the sacred magic of abramelin here i will explain the whole process of abramelin clearly and give an outline of how to use it to meet the holy guardian angel the archangels and the archdemons and to use the magic squares to gain terrifying powers also in a sense the sacred magic of abramelin is the key to the whole grimoire tradition because all other grimoires may be blended into its structure as we shall see it s also a play of words on the title of the key of solomon and the lesser key of solomon well known old grimoires another key to the magic of abramelin is that it does not use pre written prayers the magician must speak to god and all spirits from the heart and in the moment also and most importantly the key of abramelin is purification and to use the book one must walk on the path of purification this is the key to the whole work

this volume focuses on the connection between modern design and architectural practices and the construction of sacred spaces not only language and ritual but space place and architecture play a significant role in constructing special or religious spaces however this concept of a constructed sacred space remains undertheorized in religious studies and the history of art and architecture in general this volume therefore revisits the question of a modern sacred space from an interdisciplinary perspective focusing on religion space and architecture during the emergence of the modern period and up until contemporary times revisiting the ways in which modern architects and artists have endeavored to create sacred spaces and buildings for the modern world will address the underlying questions of how religious ideas especially those related to esotericism and to alternative religiosities have transformed the way sacred spaces are conceptualized today
