this 1989 book covers the geology and geomorphology of the carboniferous limestone areas of wales and summarises the state of knowledge of the main cave systems including the longest and deepest in britain it sets out to assess the morphological evolution of the cave systems and the associated landscape features particularly in light of the effects of successive glaciations the book also covers related subjects including the biology of the cave faunas important archaeological discoveries in welsh caves and the hydrology of the limestone masses on its publication this was the first book to give a general survey of the subject it will continue to provide a valuable reference for cavers and also for geologists geographers biologists and archaeologists with special interests in the area

in qumran studies the attention of scholars has largely been focused on the dead sea scrolls while archaeology has concentrated above all on the settlement this volume presents the proceedings of an international conference lugano 2014 dedicated entirely to the caves of qumran the papers deal with both archaeological and textual issues comparing the caves

in the vicinity of qumran between themselves and their contents with the other finds in the dead sea region the relationships between the caves and the settlement of qumran are re examined and their connections with the regional context are investigated the original inventory of the materials excavated from the caves by roland de vaux is published for the first time in appendix to the volume
