this work is divided into two autonomous books the first book the state represents a radically new political system of society one which is the most democratic system ever possible this is a completely new society a real civil society which otherwise in the capitalist system is only a utopia in this book i scrutinize the principles of scientific socialism i e all those principles of marxism concerning the state that build socialism as a political system the second book the economic theory of socialism is a sequel and as far as i know the only sequel of the greatest work by karl marx capital the economics of socialism makes marx s socialism already completely possible in this book i scrutinize the economic laws that build socialism as a more effective economic system than capitalism these laws are extracted from marx s main work capital from 1917 to 1991 the totalitarian system in ussr and east europe was called socialism and even by the scientific nonsense and absurd names of communism and communist system in this system the official ideology was allegedly marxism but really it could not endure any marxist criticism there was never any socialism anywhere in the twentieth century we passed through a system of utopian socialism as proof that this was not socialism that was not possible but for the utopia of writers before and after marx we were visited by a utopian socialism which at the contemporary stage is simply capitalism state monopolistic there is no better application of keynes s doctrine than the socialism of the twentieth century his planned capitalism is actually planned socialism

in this major new work the result of a lifetime of intellectual engagement one of the developing world s most famous thinkers reflects on the times we live in he argues that us hegemony has reached a dangerous new level under george bush jr and that the us president s hubristic militarism will both lead to a never ending cycle of wars and block all hopes of social and democratic progress not just in developing countries but in the north as well samir amin also rejects the highly ideological notion that the current form of neoliberal capitalism really existing capitalism in which imperialism is an integral and permanent part is an inevitable future for humanity or in fact socially or politically tolerable at the same time he is not opposed to globalization as such indeed he believes the whole world today is irrevocably

connected and that solidarity in diversity is the key to the struggle for a better world in the body of the book Amin provides a perspicacious analysis of tendencies within the rich countries the US Europe and Japan the rising powers China and India the likely future trajectory of post Soviet Russia and the developing world the central question he pursues is whether there are other hegemonic blocs that may emerge in time to circumscribe American power and constrain free market capitalism and force it to adjust to demands other than its narrow central economic logic this important and thought provoking book identifies the key global campaigns Samir feels progressives should launch around the world another world is possible but he warns the diverse citizens movements loosely gathered together in the World Social Forum must bite the political bullet and recognise that they can only transform the world if they seek political power
