one of few truly gifted essayists who have turned their talents to science wyn wachhorst here fashions a luminous meditation on the meaning of space exploration from a montage of images and reflections on humanity s dream of spaceflight in a survey of major figures from johannes kepler to wernher von braun he sees in the rise of spaceflight a metaphor of modern history as a recurrent story of transformation and rebirth other essays offer new perspectives on the nature of wonder recall the romantic vision of the decades prior to sputnik nostalgia for a bygone future and look at the larger meaning of the moon landing seeing in spaceflight not only a spiritual quest in the broadest sense of the word but a cure for the withered capacity for wonder that afflicts the postmodern mind
