il testo intende essere di supporto ad un primo insegnamento di analisi matematica secondo i principi dei nuovi ordinamenti didattici. È in particolare pensato per ingegneria informatica fisica. Il testo presenta tre diversi livelli di lettura: un livello essenziale permette allo studente di cogliere i concetti indispensabili della materia e di familiarizzarsi con le relative tecniche di calcolo; un livello intermedio fornisce le giustificazioni dei principali risultati e arricchisce l'esposizione mediante utili osservazioni e complementi; un terzo livello di lettura basato su numerosi riferimenti ad un testo virtuale disponibile in rete permette all'allievo più motivato ed interessato di approfondire la sua preparazione sulla materia. Completano il testo numerosi esempi ed esercizi con soluzioni. La grafica accattivante a 2 colori fa di questo testo un punto di riferimento fondamentale per lo studio della disciplina.

el objetivo esencial de este libro es el desarrollo de la lógica matemática y de la teoría de conjuntos partiendo de su raíz el retículo de boole aunque su parte más llamativa es que en él desarrollamos una axiomática de lógica binaria con la cual también podemos desarrollar lógica polivalente para 4 8 16 32 valores

an incredible season for algebraic geometry flourished in Italy between 1860 when Luigi Cremona was assigned the chair of geometria superiore in Bologna and 1959 when Francesco Severi published the last volume of the treatise on algebraic systems over a surface and an algebraic variety. This century long season has had a prominent influence on the evolution of complex algebraic geometry both at the national and international levels and still inspires modern research in the area. Algebraic geometry in Italy between tradition and future is a collection of contributions aiming at presenting some of these powerful ideas and their connection to contemporary and if possible future developments such as Cremonian transformations, birational classification of high dimensional varieties starting from Gino Fano, the life and works of Guido Castelnuovo, Francesco Severi, S. Mathematical Library etc. The presentation is enriched by the viewpoint of various researchers of the history of mathematics who describe the cultural milieu and tell about the bios of some of the most famous mathematicians of those times.
