for more than 65 years this best selling text by Drs Barbara J. Bain, Imelda Bates and Mike A. Laffan has been the worldwide standard in laboratory haematology. The 12th edition of Dacie and Lewis Practical Haematology continues the tradition of excellence with thorough coverage of all of the techniques used in the investigation of patients with blood disorders, including the latest technologies as well as traditional manual methods of measurement. You

It finds expert discussions of the principles of each test possible causes of error and the interpretation and clinical significance of the findings a unique section on haematology in under resourced laboratories ideal as a laboratory reference or as a comprehensive exam study tool diagnosis molecular testing blood transfusion and much more complete coverage of the latest advances in the field an expanded section on coagulation now covers testing for new anticoagulants and includes clinical applications of the tests

highly commended at 2012 bma awards in internal medicine category recognized worldwide as the standard reference work dacie lewis practical haematology is a must have reference for any haematology laboratory it covers all of the techniques used in the investigation of patients with blood disorders including the latest technologies as well as the tried and true manual methods of measurement it discusses the principles of each test possible causes of error the rationale for choosing one method over another and the interpretation significance and clinical relevance of these findings each chapter conforms to a template providing quick access to key information

this is a highly successful practical manual with a worldwide reputation that describes all of the techniques used in the investigation of patients with blood diseases it discusses the principles of each test possible causes of error and the interpretation and clinical significance of the results each chapter conforms to a specific template enabling quick and easy access to key information concise and informative contains all the necessary instructions for performing and interpreting laboratory tests standardized tests conform to the recommendations of the international council for standardisation in haematology and world health organisation useful at all levels from primary health centres to specialised centres with sophisticated technology logical laboratory approach to clinical situations given in the form of decision trees thorough emphasises the importance of attention to technical details of methods together with critical perspective on their interpretation and clinical utility

this practical manual continues to describe all of the techniques used in the investigation of patients with blood diseases it discusses the principles of each test possible causes of error and the interpretation and clinical significance of the results the use of standards reference reagents and quality control is stressed throughout and new information and techniques have been added to bring this edition completely up to date

covers the latest advances and techniques in laboratory practice provides concise and practical guidance on how to perform and interpret laboratory tests includes high quality microscopic images useful algorithms tables hematology instruments have changed significantly in design over the years and the content will be updated to reflect these advancements updated guidance on incidences of blood related disorders that are rapidly increasing on a global scale including cancer anemia malaria thalassemia myelodysplastic syndrome etc a the rising incidence of kidney diseases is expected to induce huge growth in the hematology market coverage of technological advances including the emergence of more efficient hematology analyzers

the second edition of essentials of haematology brings students fully up to date with common haematologic disorders and blood transfusion with an emphasis on pathogenesis diagnosis and treatment divided into five sections topics include blood physiology red and white blood cell disorders haemostasis disorders and blood transfusion each chapter discusses the diagnosis and treatment of a different disorder and the final section describes transfusion techniques this comprehensive new edition includes more than 400 full colour figures tables and illustrations with descriptions to assist learning key points new edition bringing students up to date with common haematologic disorders and blood transfusion emphasis on pathogenesis diagnosis and treatment includes more than 400 full colour figures tables and illustrations previous edition published in 2006

the approach described in this book is different from that in most student texts and has been very successful in practice starting almost from scratch but omitting many of the basics such as the details of hematopoiesis laboratory technology and so on which are hardly relevant to the practising clinician and student in the wards and are primarily of interest to the hematologist and sometimes to the clinical specialist considerable emphasis is given to the clinical history and examination and the interpretation of the clinical patterns thus exposed hopefully it will overcome many of the traditional problems experienced in practical diagnostic haematology

a cross between a dictionary and an encyclopedia desk reference for hematology second edition presents a concise yet thorough examination of hematology and its relationship with other systems and disorders the 1500 alphabetically listed articles provide quick and easy access to expert information the 150 tables put precise data at your f

this book provides in depth knowledge of clinical pathology in a question and answer format and discusses procedures and methods of laboratory investigations along with interpretation and analysis of diagnostic data also includes new chapter on quality control procedures and principles investigations of anaemia investigations of urinary tract infection and investigations of reproductive tract infection

this unique book is written by barbara bain a leading haematologist with a reputation for her educational prowess in the field it provides a concise overview of the haemoglobinopathies and focuses on the selection performance and interpretation of relevant laboratory tests the tests dealt with are mainly those done regularly in diagnostic haematology laboratories where more specialist tests are required the reader is given an overview of what the specialist centre will do with guidance on what the result will imply this book is extremely practical in orientation and is an essential reference volume in the haematology laboratory haemoglobinopathy diagnosis is ideal for trainees and residents in haematology hematologists in practice laboratory scientists why buy this book new edition fully updated with 43 new pictures and 37 pages of illustrated clinical cases to use for teaching and self evaluation essential reference volume for the haematology laboratory focuses on diagnosis very practical in its approach in addition to the self assessment case studies contains test your knowledge sections at the end of every chapter remarkably comprehensive for a compact book
