this book presents evidence in support of the hypothesis that ship english of the early atlantic colonial period was a distinct variety with characteristic features it is motivated by the recognition that late seventeenth and early eighteenth century sailors speech was potentially an influential variety in nascent creoles and english varieties of the caribbean yet few academic studies have attempted to define the characteristics of this speech therefore the two principal aims of this study were firstly to outline the socio demographics of the maritime communities and examine how variant linguistic features may have developed and spread among these communities and secondly to generate baseline data on the characteristic features of ship english the methodology s data collection strategy targeted written

representations of sailors speech prepared or published between the dates 1620 and 1750 and prioritized documents that were composed by working mariners these written representations were then analyzed following a mixed methods triangulation design that converged the qualitative and quantitative data to determine plausible interpretations of the most likely spoken forms findings substantiate claims that there was a distinct dialect of english that was spoken by sailors during the period of early english colonial expansion they also suggest that ship english was a sociolect formed through the mixing leveling and simplification processes of koinization indicators suggest that this occupation specific variety stabilized and spread in maritime communities through predominantly oral speech practices and strong affiliations among groups of sailors it was also transferred to port communities and sailors home regions through regular contact between sailors speaking this sociolect and the land based service providers and communities that maintained and supplied the fleets linguistic data show that morphological characteristics of ship english are evident at the word level and syntactic characteristics are evident not only in phrase construction but also at the larger clause and sentence levels whilst discourse is marked by characteristic patterns of subordination and culture specific interjection patterns the newly identified characteristics of ship english detailed here provide baseline data that may now serve as an entry point for scholars to integrate this language variety into the discourse on dialect variation in early modern english period and the theories on pidgin and creole genesis as a result of language contact in the early colonial period

the writer s options encourages readers to investigate their writing options through sentence combining and rearrangement to create more sophisticated more effective compositions the text contains ample practice with arranging and rearranging sentences paragraphs and essays as a means of strengthening prose and conveying a more effective message
