in many respects the agreement systems of slavonic languages are close to canonical

controllers of agreement are often present they have overt expression of features and they take consistent agreements the target has obligatory bound expression of agreement and there is matching of features values for person number and gender how ever slavonic also shows several very interesting instances of agreement choices induced by a range of different controller types these agreement choices provide good evidence for the constraints of the agreement hierarchy and the predicate hierarchy as well as for various types of condition on agreement notably animacy and precedence

this book investigates the history of national disunity in germany since the end of the second world war from a linguistic perspective what was the role of language in the ideological conflicts of the cold war and in the difficult process of rebuilding the german nation after 1990 in the first part of the book patrick stevenson explores the ways in which the idea of the national language contributed to the political tensions between the two german states and to the different social experiences of their citizens he begins by showing how the modern linguistic conflict between east and west in germany has its roots in a long tradition of debates on the relationship between language and national identity he then describes the use of linguistic strategies to reinforce the development of a socialist state in the gdr and argues that they ultimately contributed to its demise the second part considers the social and linguistic consequences of unification the author discusses the challenges imposed on east germans by the sudden formation of a single speech community and examines how conflicting representations of easterners and westerners for example in personal interactions the media and advertising have hindered progress towards national unity german division and re unification were crucial to the development of europe in the second half of the twentieth century this fascinating account of the relationship between language and social conflict in germany throws new light on these events and raises important questions for the study of

divided speech communities elsewhere the book will interest sociolinguists historians sociologists and political scientists
