in this book the expansion of human right legislation in national and international law is examined from theoretical and comparative perspectives

this interdisciplinary book explores human rights in the americas from multiple perspectives and fields taking 1492 as a point of departure the text explores eurocentric historiographies of human

rights and offer a more complete understanding of the genealogy of the human rights discourse and its many manifestations in the americas the essays use a variety of approaches to reveal the larger contexts from which they emerge providing a cross sectional view of subjects countries methodologies and foci explicitly dedicated toward understanding historical factors and circumstances that have shaped human rights nationally and internationally within the americas the chapters explore diverse cultural philosophical political and literary expressions where human rights discourses circulate across the continent taking into consideration issues such as race class gender genealogy and nationality while acknowledging the ongoing centrality of the nation the volume promotes a shift in the study of the americas as a dynamic transnational space of conflict domination resistance negotiation complicity accommodation dialogue and solidarity where individuals nations peoples institutions and intellectual and political movements share struggles experiences and imaginaries it will be of interest to all scholars and students of interamerican studies and those from all disciplines interested in human rights

institutions matter for the advancement of human rights in global health given the dramatic development of human rights under international law and the parallel proliferation of global institutions for public health there arises an imperative to understand the implementation of human rights through global health governance this volume examines the evolving relationship between human rights global governance and public health studying an expansive set of health challenges through a multi sectoral array of global organizations to analyze the structural determinants of rights based governance the organizations in this volume include those international bureaucracies that implement human rights in ways that influence public health in a globalizing world this volume brings together leading health and human rights scholars and practitioners from academia non governmental organizations and the united nations system they explore the foundations of human rights as a normative framework for global health governance the mandate of the world health organization to pursue a human rights based approach to health the role of inter governmental organizations across a range of health related human rights the influence of rights based economic governance on public health and the focus on global health among institutions of human rights governance contributing chapters each map the distinct human rights efforts within a specific institution of global governance for health through the comparative institutional analysis in this volume the contributing authors examine institutional dynamics to operationalize human rights in organizational policies programs and practices and assess institutional factors that facilitate or inhibit human rights mainstreaming for global health

advancement

the sage handbook of human rights will comprise a two volume set consisting of more than 50 original chapters that clarify and analyze human rights issues of both contemporary and future importance the handbook will take an inter disciplinary approach combining work in such traditional fields as law political science and philosophy with such non traditional subjects as climate change demography economics geography urban studies mass communication and business and marketing in addition one of the aspects of mainstreaming is the manner in which human rights has come to play a prominent role in popular culture and there will be a section on human rights in art film music and literature not only will the handbook provide a state of the art analysis of the discipline that addresses the history and development of human rights standards and its movements mechanisms and institutions but it will seek to go beyond this and produce a book that will help lead to prospective thinking

human rights in transition combines rich theoretical reflections with practice informed observations about human rights to consider the present the recent and distant past and the future of human rights

the continuous expansion of human rights can often appear to be positive yet it provokes criticism this volume argues against the internationalisation of human rights proving the world is moving from bilateralism to community interests stating contentious supervision evaluation and substitution are far more common than genuine cooperation

this volume explores the place of human rights in history providing an alternative framework for understanding the political and legal dilemmas that these conflicts presented with case studies focusing on the 1940s through the present

the era of technology in which we reside has ushered in a more globalized and connected world while many benefits are gained from this connectivity possible disadvantages to issues of human rights are developed as well defending human rights and democracy in the era of globalization is a pivotal resource for the latest research on the effects of a globalized society regarding issues relating to social ethics and civil rights highlighting relevant concepts on political autonomy migration and asylum this book is ideally designed for academicians professionals practitioners and upper level students interested in the ongoing concerns of human rights

this book is designed to introduce law students legal actors and human rights activists particularly participants in human rights dialogues with china to the process and reality of a newly confident china s participation in the international human rights system albeit with inherent challenges from an international and comparative perspective one of the key findings of the author s research is that progress towards human rights depends more on judges than on legislators chinese legislators have enacted a series of reforms in order to better protect human rights unfortunately these reforms have not led to greater adherence to china s international human rights obligations in practice the reforms failed because they have generally been misunderstood by chinese judges who often have a limited understanding of international human rights norms specifically this book will examine how judicial misunderstandings have blocked reforms in one specific area the use of severe punishments based on international human rights theory and case studies and data analyses this examination has several purposes the first is to suggest that china ratify the iccpr as the next step for its substantive progress in human rights and as a good preparation for its re applying to be a member of the un human right council in the future the second is to explain how judges could be better educated in international human rights norms so as to greatly reduce the use of severe punishments and better comply with china s human rights obligations the third is to demonstrate how the international community could better engage with china in a manner that is more conducive to human rights improvements the author s ultimate goal is to enhance dialogue on human rights in china between judges and the chinese government between chinese judges and their foreign counterparts and between china s government and the international community another significant aim of this book is to clarify the controversial question of what obligations china should undertake before its ratification of the iccpr and to re examine trends in its developing human rights policy after standing down from the council in late 2012 the tortuous progress of china s criminal law and criminal justice reforms has confirmed that chinese judges need further instruction on how to apply severe punishments in a manner consistent with international standards judges should be encouraged to exercise more discretion when sentencing so that penalties reflect the intent of relevant domestic laws as well as the international human rights standards enumerated in the iccpr in order to better educate and train judges this book contains introductory chapters that examine the severe punishments currently available to chinese judges from an international human rights perspective to illustrate how chinese justice currently falls short of international norms this paper also examines several cases that are considered to be indicative of china s progress towards greater respect for human rights and the

rule of law these cases demonstrate that china still has a long way to go to achieve its goals at least before abolishing the death penalty forced labor and torture

an overview of human rights issues including the historical basis for the movement to uphold human rights internationally and a look at the state of civil political economic and social rights today

human rights are acquiring an increasingly prominent role on the world stage interest in concern about and action on human rights are widespread and rising albeit in a far from globally even uniform and untroubled fashion human rights have generated a booming global industry while having become not unconnectedly highly controversial and deeply contested human rights matters have emerged as a major source of disagreement dispute and discord at and between the local regional and global levels of social cultural political and economic life these developments are addressed in the book by an examination of the links between the evolving global human rights regime ghrr and the character and course of human rights in the world s most dynamic complex and problematic region that of the asia pacific the authors argue that although the asia pacific and human rights nexus is influenced by cultural clashes it is largely shaped by power distributions and struggles rooted in the global political economy gpe the prevailing ghrr reflects the way in which globalization processes have been western led but its future is far from certain given the current shift in the balance of gpe power towards the asia pacific and especially east asia

the concept of human rights has a long history its practical origins as distinct from its theoretical antecedents are said to be comparatively recent going back no further than the american and french bills of rights of the eighteenth century even those landmarks are seen as little more than the precursors of the twentieth century starting point the universal declaration of human rights which was adopted by the general assembly of the united nations in 1948 in this unique and stimulating book richard bauman investigates the concept of human rights in the roman world he argues that on the theoretical side ideas were developed by thinkers such as cicero and seneca and on the pragmatic side practical applications were rewarded mainly through the law he presents a comprehensive analysis of human rights in ancient rome and offers enlightening comparisons between the roman and twentieth century understanding of human rights

ours has been called a global age of rights an era in which respect for human rights is considered

the highest aspiration of the international democratic community since the United Nations 1948 Universal Declaration of Human Rights a wide variety of protections civil political economic social and cultural have been given legal validation as countries ratify treaties participate in intergovernmental organizations and establish human rights tribunals and truth and reconciliation commissions yet notable human rights failures have marred the post declaration era including ongoing state violence toward citizens the selectivity of humanitarian intervention evidenced by the international community's failure to respond in Rwanda and recent legislation in advanced democracies that trades some rights for protection against the threat of terrorism how are we to reconcile the language of rights with the reality do we live in an age of rights after all in protecting human rights Todd Landman provides a unique quantitative analysis of the marked gap between the principle and practice of human rights applying theories and methods from the fields of international law international relations and comparative politics Landman examines data from 193 countries over 25 years 1976 2000 to assess the growth of the international human rights regime the effect of law on actual protection and global variation in human rights norms Landman contends that human rights foreign policy remains based more on geo strategic interest than moral internationalism he argues that the influence human rights ideals have begun to have on states cannot be separated from the broader impact of socioeconomic changes that swept the globe in the late twentieth century Landman concludes that international law alone will not suffice to fully protect human rights it must be accompanied by democratic government effective conflict resolution and just economic systems

this third edition of *Human Rights Between Idealism and Realism* presents human rights in action focusing on their effectiveness as legal tools designed to benefit human beings by combining conceptual analysis with an emphasis on procedures and mechanisms of implementation this volume provides a multidimensional overview of human rights after examining briefly the history of human rights the author analyses the intellectual framework that forms the basis of their legitimacy in particular he covers the concept of universality and the widely used model that classifies human rights into clusters of different generations in this edition the author brings together the fundamental aspects of human rights law addressing human dignity as the ethical foundation of human rights the principle of equality and non discrimination as the essence of any culture of human rights the protections against racial discrimination and discrimination against women and assesses the individual as a subject of international law the volume then moves on to assess the activities of the political institutions of the United Nations the expert bodies established

by the relevant treaties and the international tribunals specifically entrusted at the regional level with protecting human rights this edition also includes specific analysis of the actions mandated by the un security council against libya in 2011 it also includes greater coverage of the jurisprudence of the inter american court of human rights and the african commission on human and peoples rights the author explains how and why the classical array of politically inspired informal devices has been enriched by the addition of international criminal procedures and by endeavours to introduce civil suits against alleged individual violators of human rights finally the volume is rounded off by a consideration of the importance of humanitarian law as an instrument for the protection of human life and dignity and an exploration of the future of human rights

in this extraordinary work of cultural and intellectual history professor hunt grounds the creation of human rights in the changes that authors brought to literature the rejection of torture as a means of finding out truth and the spread of empathy over the centuries

human rights in theory and practice an overview of concepts and treaties includes detailed examination of the provisions of major human rights treaties
