when human beings are at their worst as they most certainly were in rwanda during the 1994 genocide the world needs the institutions of journalism and the media to be at their best sadly in rwanda the media fell short media and mass atrocity revisits the case of rwanda but also examines how the nexus between media and mass atrocity has been shaped by the dramatic rise of social media it has been twenty five years since rwanda slid into the abyss the killings happened in broad daylight but many of us turned away a quarter century later there is still much to learn about the relationship between the media and genocide an issue laid bare by the rwanda tragedy media and mass atrocity revisits the debate over the role of traditional news media in rwanda where confronted by the horrors taking place

international news media for the most part turned away and at times muddled the story when they did pay attention hate media outlets in rwanda played a role in laying the groundwork for genocide and then actively encouraged the extermination campaign the news media not only failed to fully grasp and communicate the genocide but mostly overlooked the war crimes committed during the genocide and in its aftermath by the rwandan patriotic front the global media landscape has been transformed since rwanda we are now saturated with social media generated as often as not by non journalists mobile phones are everywhere and in many quarters the traditional news media business model continues to recede against that backdrop it is more important than ever to examine the nexus between media and mass atrocity the book includes an extensive section on the echoes of rwanda which looks at the cases of darfur the central african republic myanmar and south sudan while the impact of social media as a new actor is examined through chapters on social media use by the islamic state and in syria and in other contexts across the developing world it also looks at the aftermath of the genocide the shifting narrative of the genocide itself the evolving debate over the role and impact of hate media in rwanda the challenge of digitizing archival records of the genocide and the fostering of free and independent media in atrocity s wake the volume also probes how journalists themselves confront mass atrocity and examines the preventive function of media through the use of advanced digital technology as well as radio programming in the lake chad basin and the democratic republic of congo media and mass atrocity questions what the lessons of rwanda mean now in an age of communications so dramatically influenced by social media and the relative decline of traditional news media

in recent years politicians led by president obama and prominent senators and governors have teamed with extremists on campus to portray our nation s institutions of higher learning as awash in a violent crime wave and to suggest preposterously that university leaders professors and students are indifferent to female sexual assault victims in their midst neither of these claims has any bearing to reality but they have achieved widespread acceptance thanks in part to misleading alarums from the obama administration and biased media coverage led by the new york times the frenzy about campus rape has helped stimulate and has been fanned by ideologically skewed campus sexual assault policies and lawless commands issued by federal bureaucrats to force the nation s all too compliant colleges and universities essentially to presume the guilt of accused students the result has been a widespread disregard of such bedrock american principles as the presumption of innocence and the need for fair play this book uses hard facts to set the record straight it explores among other things nearly two dozen of the cases since 2010 in which students who in all likelihood would have or have subsequently been found not guilty in a court of law have in a lopsided process been hastily and carelessly branded as sex criminals and expelled or otherwise punished by their colleges often after being tarred and feathered by their fellow students and it shows why all students and eventually society as a whole are harmed when our nation s universities abandon pursuit of truth and seek instead to accommodate the passions of the mob as detailed in the new epilogue some encouraging events have transpired since this book was first published in october 2016 a majority of the judicial

rulings in dozens of lawsuits by male students claiming their schools treated them unfairly and discriminated against them based on their gender have rebuked the schools for their handling of these cases and education secretary betsy devo called for fairness to accused students and accusers alike revoked most of the guilt presuming obama era policies and began a protracted rule making process designed to compel procedural fairness and nondiscrimination
