an intelligent amusing and affectionate look at cats in history literature and art

a comprehensive richly illustrated introduction to the behavior and qualities of the cat of all the domesticated species cats have enjoyed the most complex relationship with people one that still leads to arguments about whether you can truly call the cat asleep by your fire tame the cat is a comprehensive richly illustrated exploration of the natural and cultural history of this much loved pet chapters on evolution development anatomy biology society behavior and cats humans take different angles on matters feline offering rich information and insights about kitten development the hierarchy of cats how cats think communication between cats and people historic and extinct breeds the challenges facing cats today and how we can help and much much more the book also features a visually stunning photographic directory of more than forty popular breeds with essential information about each filled with surprising facts the cat will enchant anyone with an interest in or a love for these animals provides a comprehensive richly illustrated introduction to

the natural and cultural history of the cat offers an in depth discussion of behavior including social organization communication courtship and learning covers anatomy and physiology including mobility predation skills and the genetics of coat colors features clear and accessible text plus infographics diagrams and some 250 stunning color photographs includes a beautiful photographic directory to more than forty breeds

the cat a natural history takes an absorbing in depth look at the biology behaviour and diversity of this popular animal provides a comprehensive richly illustrated introduction to the natural and cultural history of the cat offers an in depth discussion of behaviour including social organization communication courtship and learning covers anatomy and physiology including mobility predation skills and the genetics of coat colors features clear and accessible text plus infographics diagrams and 250 stunning color photographs includes a beautiful photographic directory of more than forty breeds tracking the evolution of the cat from its first ancestor the pseudaelurus to the emergence of the modern domestic cat sarah brown looks at how different lineages of the species developed and how the domestic cat felis came into contact with humans clear accounts of how the cat s body functions help explain its extraordinary ability to balance assess its hunting abilities and understand its health and dietary needs details about the range of coat types and colors and their genetics give a comprehensive overview of the many breeds and nonbreeds we see today descriptions of the function of whiskers the cat s reliance on their sense of smell and the sensory importance of the tongue all contribute to our understanding of the cat s physiology cat communication by different means is covered including vocalization and

non vocal communication whether living in the wild on the streets or in a domestic setting learning how to relate to other cats is a central element to cats socialization and this is discussed as part of an in depth look at cat behaviour the cat s notorious independent spirit and how it affects the cat human relationship is assessed and we take a look at attitudes to cats over the centuries and show how cats have featured in culture the author offers advice on how to promote feline harmony in a multi cat household and how to enhance your pet s physical and mental well being a directory of breeds features gorgeous photographs of more than 40 popular breeds alongside details of their characteristics genetic background and care requirements modern breeding and associated issues are raised and a comprehensive glossary of medical terms covers health issues that owners need to know anyone with an interest in or love for cats and all those who have owned a cat will find much to learn and enjoy in the cat a natural history

references 59 subject index 65 6 introduction the retina as an organ of perception of light colour shape and movement has been the subject of numerous and intensive light and electron microscopical investigations to date the interest in these has largely been concentrated on the structure of the ma ture retina and the genesis of its cellular elements the first exhaustive observations on the development of the retina in vertebrates were made by babuchin 1863 using the retinae of chicken embryos he showed that millier s radial fibres and the ganglion cells are the first to develop while the receptor segments are the last subsequently the early differentiation of millier s radial fibres was often reaffirmed cajal 1893 meller 1968 bhattacharjee and sanyal 1975 and others furthermore babuchin had already indicated that the

structural development in the area of the posterior pole is very rapid compared with those regions of the retina which are situated more peripherally today when comparing results of electron microscopical investigations this fact is of particular importance since in each case only very limited areas of the retina can be examined schultze 1867a b pointed out the uniformity of origin and the general classification of light perceiving elements into inner and outer segments thus contesting the hitherto generally held opinion that these structures like the pigment epithelium originate of the eye cup in 1881 ogneff discovered the analogous ginate from the outer leaf mode of formation in birds and mammals
