in the idea of sport in western culture from antiquity to the contemporary era dr saverio battente examines the concept of sport as an element of western culture sport has aided in structuring the collective identities that underpin individual civilisations in the west and far from being a merely marginal phenomenon it has in fact been an essential feature of western civilisation and culture from antiquity in its various forms the starting point of the book is the idea that there is a certain number of universal traits unchanged across time and different cultures underlying all sports even if there are a series of entirely original elements with which sport has been linked over the centuries in specific civilizations this volume thus makes a comparative analysis of the ancient modern and contemporary worlds and various national contexts longues durées whose presence transcends anthropological and cultural barriers divergences and discontinuities pertaining to the concept of sport are identified and explored the book also looks at the link between the rise of civilisation and the educational and training function of sport as well as the connection between a culture s decline and a growing emphasis on sport as an element of entertainment and spectacle in and of itself
