this volume shows the pervasiveness over a millennium and a half of the little studied phenomenon of multi tier intertextuality whether as linear window reference where author c simultaneously imitates or alludes to a text by author a and its imitation by author b or as multi directional imitative clusters it begins with essays on classical literature from homer to the high roman empire where the feature first becomes prominent then comes late antiquity a lively area of research at present and after a series of essays on european neo latin literature from petrarch to 1600 another area where developments are moving rapidly the volume concludes with early modern vernacular literatures italian french portuguese and english most papers concern verse but prose is not ignored the introduction to the volume discusses the relevant methodological issues an afterword outlines the critical history of window reference and includes a short essay by professor richard thomas of harvard university who coined the term in the 1980s

the 5th volume of green chemical processing considers sustainable chemistry in the context of governmental and corporate interests explaining how red tape can help or hinder the greening of industry processes the american chemical society's 12 principles of green chemistry are woven throughout this text as well as the series

to which this book belongs

resource management in fire dominated ecosystems requires an understanding of the probability of wildfire occurring spreading at different points in a landscape this report describes an approach to evaluating wildfire susceptibility or burn probability for fire prone landscapes such as the boreal forest of north america the approach involves use of the burn p3 probability prediction planning landscape level simulation model which combines deterministic fire growth based on the canadian fire behaviour prediction system and spatial data for forest fuels topography with probabilistic fire ignitions spread events derived from historical fire weather data a case study of the application of burn p3 is undertaken for a boreal mixedwood area of central saskatchewan the results presented highlight the importance of landscape features to wildfire susceptibility and indicate whether assessments based solely on stand level characteristics are adequate

the 19 original papers on the tectonic evolution of mountain systems were collected to mark the 50th anniversary of price s description of the canadian cordillera a sampling of topics turns up the driving mechanism and three dimensional circulation of plate tectonics the belt purcell basic as the keystone of the rocky mountain fold and thrust belt in the us and canada silurian devonian orogenic events in the central appalachians and the crystalline southern appalachians and defining the eastern boundary of the north asian craton from structural and subsidence history studies of the verkhoysk fold and thrust belt a fold out sheet of color maps and diagrams is tucked into a pocket inside the back cover
