the ionosphere is a layer of the earth s atmosphere that extends from about 50 km to
1000 km above the earth s surface it is ionized by solar radiation which creates ions
and free electrons in the upper atmosphere these ions and electrons reflect radio
waves back to the earth s surface allowing long distance radio communication as well
as absorption of harmful solar radiation ionospheric conductivity monitoring assesses
the state of the ionosphere and improves the accuracy of satellite communications this
book is organized into two sections on the influence and impact of transient or orbiting
humanmade objects into the ionosphere and the monitoring and modeling of the
temporal evolution of the ionosphere the information presented will lead to a better
understanding and forecasting of the ionosphere s dynamic
