this text introduces the reader to a sociological perspective on industrial society aimed at students both within and outside the social sciences who seek a general understanding of the social consequences of economic change since it assumes that most of its readers will end up working in management the book focuses upon the business enterprise and social relationships within it aiming to provide a general background which will lay the foundations for more detailed study of organisational processes and the problems of management

economic technological and sociopolitical changes have been transforming the cultures of advanced industrial societies in profoundly important ways during the past few decades this ambitious work examines changes in religious beliefs in motives for work in the issues that give rise to political conflict in the importance people attach to having children and families and in attitudes toward divorce abortion and homosexuality ronald ingelhart s earlier book the silent revolution princeton 1977 broke new ground by discovering a major intergenerational shift in the values of the populations of advanced industrial societies this new volume demonstrates that this value shift is part of a much broader process of cultural change that is gradually transforming political economic and social life in these societies ingelhart uses a massive body of time series survey

data from twenty six nations gathered from 1970 through 1988 to analyze the cultural changes that are occurring as younger generations gradually replace older ones in the adult population these changes have far reaching political implications and they seem to be transforming the economic growth rates of societies and the kind of economic development that is pursued

an analysis of the condition of western societies that will take its place as a core text of contemporary sociology alongside earlier typifications of society as postindustrial and current debates about the social dimensions of the postmodern

originally published in england in 1959 this book evolves a new theory of conflict in industrial society by way of illustrating and testing this theory the book provides detailed analyses of various social phenomena the author carries out a full critique of marx in the light of history and modern sociology and discusses the theories of class conflict of james burnham fritz croner and karl renner
