get a quick expert overview of all types of addiction from substance use disorders to behavioral addictions and more this practical resource presents a focused summary of today s current knowledge on topics of interest to all health care professionals who work with those who suffer from this wide ranging problem it provides current relevant information on emerging findings best practices and treatment challenges covering a variety of assessment and treatment strategies and making it a one stop resource for staying up to date in this critical area discusses precision health in addiction the latest trend of electronic cigarettes state of the art treatments for opioid use disorder and cannabis use disorder best practices for chronic pain prevention among adolescents the role of physicians in the prescription drug epidemic and the role of integrative interventions in addiction treatment includes coverage of behavioral addictions such as internet sex and gambling food addiction ptsd and substance use disorders preventing relapse the neurobiology of addiction and more consolidates today s available information on this timely topic into one convenient resource

this classic volume includes developments in crisis intervention practices and services a field that was permanently altered on september 11th 2001 with 15 new chapters and a new section on disaster mental health and frontline crisis intervention strategies this book gives professionals access to specific guidelines practice techniques protective factors 60 case study applications and evidence based crisis intervention strategies that maximize opportunities for rapid assessment and crisis resolution this highly practical timely and reader friendly handbook addresses the full range of acute substance abuse battering sexually transmitted diseases bio terrorism and terrorist bombings this new edition remains essential reading for crisis workers crisis counselors behavioral health clinicians emergency service workers disaster mental health specialists and social workers

ambivalence poor adherence to treatment serious psychiatric and medical comorbidities the difficulties posed by patients of substance use disorders are among the most challenging for practitioners to face given that only 10 of patients with these disorders actually receive specialized addiction treatment it s clear that physicians in all medical and surgical specialties need to become comfortable assessing and treating substance use disorders the pocket guide to addiction assessment and treatment is designed specifically to aid a wide range of clinicians regardless of their training in addiction to more confidently assess and treat this patient population the book s

practical actionable content is divided into three sections fundamentals of addiction substances and behaviors and treatment that address topics including the neurobiology of addiction how to recognize and treat intoxication withdrawal from and addiction to substances such as alcohol anabolic androgenic steroids benzodiazepines cannabis opioids stimulants and tobacco as well as hallucinogens inhalants and caffeine special issues with psychiatric and medical comorbidities as well as with specific populations behavioral addictions with a special focus on gambling disorder cognitive behavioral therapy 12 step programs nutrition and exercise spirituality mindfulness and meditation and other treatment options with examples of how each can be used with patients facing addictions with an accessible easily referenced format the pocket guide to addiction assessment and treatment serves as a go to resource for general psychiatrists internists family practitioners pediatricians emergency medicine physicians psychiatric nurses residents medical students and other practitioners involved in the addiction treatment field and because all of the diagnostic discussions are dsm 5 based readers can be confident that they re getting the most relevant and up to date guidance on the topic

although one person s addiction almost inevitably affects his or her family members a surprising number of treatment models appear to operate under the assumption that an individual s addiction occurs in a vacuum by not paying sufficient attention to preexisting family dynamics whether dysfunctional supportive or somewhere in between counselors run the risk of not fully understanding the roots of an individual s addictions or the obstacles to his recovery as a result counselors may undermine their own treatment efforts both by neglecting any underlying family problems and by failing to capitalize upon a family s potential assistance in an intervention with the addicted individual in counseling addicted families gerald a juhnke and william bryce hagedorn address this problem head on recognizing that even those treatment providers who understand the importance of the familial context of addiction are often stymied by the variety of family treatment theories and their often imperfect fit for cases of addiction juhnke and hagedorn provide a truly integrated model for assessment and treatment based upon the authors combined 23 years of experience in clinical and treatment supervision the integrated family addictions model consists of six progressive treatment tiers which organize the relevant family treatment theories into a graduated and coherent sequence beginning with the briefest and least costly forms of therapy if one of the lower tiers allows clients to reach their treatment goals the patient and therapist need not waste time and resources following the full continuum if however their needs are still unmet they can progress in a logical fashion to more advanced and intensive forms of therapy the book is divided into three broad topic areas designed to provide counselors and graduate students with essential information both about addictions and about the practical applications of various treatment theories part one discusses the prevalence of addictions their negative impact upon families and the primary existing addiction treatment models including their limitations and benefits part two outlines methods of assessment for individual cases and part three presents the integrated family addictions model in detail along the way the authors deal with specific interventions for families dealing with violence and dual diagnosis the book

concludes with an epilogue on professional training which includes an overview of the major professional addiction and marriage and family counseling organizations and the ways in which they might benefit individual practices and practitioners

the authors combine their diverse training and disciplinary backgrounds to create a workable approach to dealing with suicidal patients much more than merely an academic text on suicide this thought provoking handbook provides detailed guidance and a true sense of what to do to help suicidal patients

first published in 1994 until recently patients with severe and long lasting mental disorders were treated primarily through hospitalisation and psychotropic medication however now there is a concerted effort to integrate treatment approaches from behavioural and rehabilitation therapies and social skills training this book presents an integration of psychological treatment and assessment practices authored by professionals with established expertise in their subject area topics of fundamentally important issues have been selected and divided into three sections assessment and treatment planning social and vocational skills development and group and family therapy in rehabilitation this volume can be used as a reference handbook a guide to clinical practice or a classroom text describing the basic psychological approaches that are effective with patients with severe mental disabilities

contains instructions and resources for activities to help children who have been referred for therapy maintain interest and motivation during the process including assessment and treatment interventions and providing activities that address key emotional and behavioral competencies with listings of recommended ages goals and materials needed for each activity

harm to others offers students and clinicians an effective way to increase their knowledge of and training in violence risk and threat assessment and it also provides a comprehensive examination of current treatment approaches although the text includes many examples from k 12 and college university settings which are particularly relevant for mental health professionals in school settings the underlying concepts and suggestions are useful for counselors psychologists and social workers who face these issues in their daily practice in an easy to understand jargon free manner dr van brunt shares his observations extensive clinical expertise and the latest research on what clinicians should be aware of when performing risk and threat assessments in addition he offers numerous examples from recent mass shootings and rampage violence to help explain the motivations and risk factors of those who make threats two detailed case examples are presented to illustrate key concepts related to assessing dangerousness treatment options are then described using a variety of diverse case studies to demonstrate concrete approaches for clients who have been identified as at risk for violence following a threat assessment requests for digital versions from aca can be found on wiley com to purchase print copies please
