what will the final state of the redeemed look like throughout the history of the church conceptions of the final state have tended to minimize the promise of the new heavens and new earth in contrast to the historical dominance of spiritual heavenly non temporal conceptions of the final state the last two decades have witnessed a rise in conceptions that include the redemption of material earthly and temporal reality these new creation conceptions have included proposals regarding the fulfillment of old testament land promises in new creation eschatology and the land steven l james argues that in recent new creation conceptions of the final state there is a logical inconsistency between the use of old testament texts to inform a renewed earth and the exclusion of the territory of israel from that renewed earth by examining a select group of new creationists james shows that the exclusion of the territorial restoration of israel in a new creation conception fails to appreciate the role of the particular territory in old testament prophetic texts and results in an inconsistent new creationism

when i was about fifteen my biological sciences teacher prof n benacchio lent me a book by paul de kruif the microbe hunters and i remained fascinated by infectious diseases i was intrigued by the potency of virulent bacteria which are constantly trying to invade our bodies and often overcome what today we call innate and adoptive immunity indeed shortly

after that i was struck by his tragic death due to peritonitis later while studying medicine although medical knowledge in the 1950s was almost primordial compared with today i soon realised how the various biological systems were wonderfully organised but at the same time frail and how our life could end in a few minutes slowly it became obvious that our wellness was the result of a dynamic and very unstable equilibrium between health and disease this unstable equilibrium could be broken forever if the body s response could not reverse the pathological state i stuck a sort of poster on the wall of my room with these three words and connecting arrows health disease death as i don t believe in another world after death it became obvious to me that we should make every possible effort not only to delay death but to try always to shift the equilibrium to the left in this book i will try to show that this can be achieved as a last resort even with ozone therapy

Darwin's theory of evolutionary descent with modification rests in part on the notion that there is heritable continuity affected by transmission between ancestor and descendant it is precisely this continuity that allows one to trace phylogenetic histories between fossil taxa of various ages and recent taxa Darwin was clear that were an analyst to attempt such tracings then the anatomical characters of choice are those least influenced by natural selection or what are today referred to as adaptively neutral traits the transmission of these traits is influenced solely by such mechanisms as drift and not by natural selection the application of Darwin's theory to archaeological phenomena requires that the theory be retooled to accommodate artifacts one aspect that has undergone this retooling concerns cultural transmission the mechanism that affects heritable continuity between cultural phenomena archaeologists have long traced what is readily interpreted as heritable continuity between artifacts but the theory underpinning their tracings is seldom explicit thus what have been referred to as artifacts styles underpin such tracings because styles are adaptively neutral other traits are referred to as functional in their introduction to style function transmission Michael O'Brien and R. Lee Lyman outline in detail the interrelations of a theory of cultural descent with modification and the concepts of drift style and function the chapters in the volume specifically address the issues of selection and drift and their relation to style and function in non polemic presentations contributors specify empirical implications of aspects of cultural transmission for evolutionary lineages of artifacts and then present archaeological data for those implications

the fifth enlargement that took place in 2004 and 2007 was a milestone in the history of the european union not only because of the large number of acceding countries but also because of their recent political and economic experience ten of them had undergone a profound transition from a totalitarian regime to democracy and from a centrally planned economy to a market based system most of them had income levels significantly below those of the then eu 15 now 6 years later we can clearly see that the process of european integration both before and after 2004 was what enabled europe to overcome the gaps between various parts of the continent the enlargement made europe a better and wealthier place and strengthened its position in the world integration into the european union has always been one of the strongest incentives for reform in the new member states particularly important in my view have been the development of financial markets through foreign direct investment and capital in flows and the opening of labour markets which was a two way phenomenon with markets being opened up in acceding as well as the incumbent member states the fifth enlargement was thus an exercise of globalisation in miniature a practice run for the union to tackle the challenges of the ever smaller world
