the grammar of focus has been studied in generative grammar from its inception it has been the subject of intense detailed cross linguistic investigation for over 20 years particularly within the principles and parameters framework it is appropriate at this point therefore to take stock appraisal at this particular point is all the more legitimate because it comes at a time of general evaluation of the results of the profound activity that has characterized the principles and parameters framework this general assessment has produced a radical new direction within that framework the volume starts off with an introductory chapter that aims to provide an outline for the assessment to be followed by an overview of the evolution of the study of focus in generative grammar and a recapitulation of the principal issues associated with focus these issues are taken up in the remaining chapters of the book where various grammatical means of marking focus as well as grammaticalization of focus marking

are analyzed in a wide variety of languages

this book provides an introduction to the models methods and results of some rescheduling problems in the presence of unexpected disruption events including job unavailability arrival of new jobs and machine breakdown the occurrence of these unexpected disruptions may cause a change in the planned schedule which may render the originally feasible schedule infeasible rescheduling which involves adjusting the original schedule to account for a disruption is necessary in order to minimize the effects of the disruption on the performance of the system this involves a trade off between finding a cost effective new schedule and avoiding excessive changes to the original schedule this book views scheduling theory as practical theory and it has made sure to emphasize the practical aspects of its topic coverage thus this book considers some scenarios existing in most real world environments such as preventive machine maintenance and deteriorating effect where the actual processing time of a job gets longer along with machine s usage and age to alleviate the effect of disruption events some flexible strategies are adopted including allocation extra resources to reduce job processing times or rejection the production of some jobs for each considered scenario depending on the model settings and on the disruption events this book addresses the complexity and the design of efficient exact or approximated algorithms especially when optimization methods and analytic tools fall short this book stresses metaheuristics including improved elitist non dominated sorting genetic algorithm and differential evolution algorithm this book also provides extensive numerical studies to evaluate the performance of the proposed algorithms the problem of rescheduling in the presence of unexpected disruption events is of great importance for the successful implementation of real world scheduling systems there is now an astounding body of knowledge in this field this book is the first monograph on rescheduling it aims at introducing the author s research achievements in rescheduling it is written for researchers and ph d students working in scheduling theory and other members of scientific community who are interested in recent scheduling models our goal is to enable the reader to know about some new achievements on this topic

required reading for anyone wishing to be conversant with tobacco control policy the book is edited by kenneth e warner dean of the school of public health at the university of michigan and a leading tobacco policy researcher who leads with an overview of the field warner s overview is supported by reprints of some of the field s most significant articles written by leading scholars and practitioners the topics discussed are taxation and price clean indoor air laws advertising ad bans and counteradvertising possession use and purchase pup laws and sales to minors cessation policy comprehensive state laws
