the tool for visualization is microsoft visual c this popular software has the standard c combined with the microsoft foundation classes mfc libraries for windows visualization this book explains how to create a graph interactively solve problems in graph theory with minimum number of c codes and provide friendly interfaces that makes learning the topics an interesting one each topic in the book comes with working visual c codes which can easily be adapted as solutions to various problems in science and engineering

the refereed proceedings of the 14th international conference on rewriting techniques and applications rta 2003 held in valencia spain in june 2003 the 26 revised regular papers and 6 system descriptions presented together with 3 invited contributions were carefully reviewed and selected from 61 submissions all current aspects of rewriting are addressed

in this new and expanded edition of the art direction handbook author michael rizzo now covers art direction for television in addition to updated coverage of film design this comprehensive professional manual details the set up of the art department and the day to day job duties scouting for locations research executing the design concept supervising scenery construction and surviving production beyond that there is an emphasis on not just how to do the job but how to succeed and secure other jobs rounding out the text is an extensive collection of useful forms and checklists as well as interviews with prominent art directors

based on the shared journey of two researchers this book explores enhancing algorithms for the resource constrained project scheduling problem it examines the search for and significance of project data from multiple distinct perspectives in the first part the quest for project data is presented as a continuous exploration of the complexity of the resource constrained project scheduling problem this quest is pursued by solving this challenging problem with the aid of state of the art algorithms from the literature each time gaining a deeper understanding of its challenging nature to provide insights into the problem s complexity project data is created manipulated and analyzed in depth to make current projects easier or harder to schedule

this challenging quest for project data has resulted in new project databases for academic research new ways of testing future algorithms and insights into how to improve future algorithms to solve this project scheduling problem with limited resources in turn the second part discusses the relevance of project data demonstrating to the reader the importance of the academic research presented in the first part for the professional world it shows how project data can be used to calibrate real project data leading to improved decision making e g for project scheduling forecasting and risk analysis the book extends a warm invitation to academics and practitioners alike as fellow seekers of knowledge to enhance their project management skills

wireless communication and sensor networks would form the backbone to create pervasive and ubiquitous environments that would have profound influence on the society and thus are important to the society the wireless communication technologies and wireless sensor networks would encompass a wide range of domains such as hw devices such as motes sensors and associated instrumentation actuators transmitters receivers antennas etc sensor network aspects such as topologies routing algorithms integration of heterogeneous network elements and topologies designing rf devices and systems for energy efficiency and reliability etc these sensor networks would provide opportunity to continuously and in a distributed manner monitor the environment and generate the necessary warnings and actions however most of the developments have been demonstrated only in controlled and laboratory environments so we are yet to see those powerful ubiquitous applications for the benefit of the society the conference and consequentially the proceedings would provide opportunity to the researchers to interact with other researchers and share their researches covering all the above areas the proceedings of the conference thus covers the research work of different authors in the area of wireless sensor networks wireless communications devices tools and techniques for wsn and applications of wireless sensor networks this book is beneficial for those researchers who are working in the area of wireless sensor networks wireless communication and developing applications of wireless sensor networks

welcome to the proceedings of the 2005 ifip international conference on bedded and ubiquitous computing euc 2005 which was held in nagasaki japan december 6 9 2005 embedded and ubiquitous computing is emerging rapidly as an exciting new paradigm to provide computing and communication services all the time erywhere its systems are now pervading every aspect of life to the point that they are hidden inside various appliances or can be worn unobtrusively as part of clothing and

jewelry this emergence is a natural outcome of research and technological advances in embedded systems pervasive computing and c munications wireless networks mobile computing distributed computing and agent technologies etc its tremendous impact on academics industry gove ment and daily life can be compared to that of electric motors over the past century in fact it but promises to revolutionize life much more profoundly than elevators electric motors or even personal computers the euc 2005 conference provided a forum for engineers and scientists in academia industry and government to address profound issues including te nical challenges safety and social legal political and economic issues and to present and discuss their ideas results work in progress and experience on all aspects of embedded and ubiquitous computing
