a provocative and surprising investigation into the ways that profit personalities and politics obstruct real progress in the war on cancer and one doctor's passionate call to action for change this year nearly 1.6 million new cases of cancer will be diagnosed and more than 1,500 people will die per day we've been asked to accept the disappointing strategy to manage cancer as a chronic disease we've allowed pharmaceutical companies to position cancer drugs that extend life by just weeks and may cost 100,000 for a single course of treatment as breakthroughs why have we been able to cure and prevent other killer diseases but not most cancers where is the bold government leadership that will transform our system from treatment to prevention have we forgotten the mission of the national cancer act of 1971 to conquer cancer through an analysis of over 40 years of medical evidence and interviews with cancer doctors researchers drug company executives and health policy advisors Dr. Cuomo reveals frank and intriguing answers to these questions she shows us how all cancer stakeholders the pharmaceutical industry government physicians and concerned Americans can change the way we view and fight cancer in this country

this book serves as a practical guide for the use of carbon ions in cancer radiotherapy on the basis of clinical experience with more than 7,000 patients with various types of tumors treated over a period of nearly 20 years at the national institute of radiological sciences step by step procedures and technological development of this modality are highlighted the book is divided into two sections the first covering the underlying principles of physics and biology and the second section is a systematic review by tumor site concentrating on the role of therapeutic techniques and the pitfalls in treatment planning readers will learn of the superior outcomes obtained with carbon ion therapy for various types of tumors in terms of local control and toxicities it is essential to understand that the

carbon ion beam is like a two edged sword unless it is used properly it can increase the risk of severe injury to critical organs in early series of dose escalation studies some patients experienced serious adverse effects such as skin ulcers pneumonitis intestinal ulcers and bone necrosis for which salvage surgery or hospitalization was required to preclude such detrimental results the adequacy of therapeutic techniques and dose fractionations was carefully examined in each case in this way significant improvements in treatment results have been achieved and major toxicities are no longer observed with that knowledge experts in relevant fields expand upon techniques for treatment delivery at each anatomical site covering indications and optimal treatment planning with its practical focus this book will benefit radiation oncologists medical physicists medical dosimetrists radiation therapists and senior nurses whose work involves radiation therapy as well as medical oncologists and others who are interested in radiation therapy

this collection of essays from world renowned scholar hans walter gabler contains writings from a decade and a half of retirement spent exploring textual criticism genetic criticism and literary criticism in these sixteen stimulating contributions he develops theories of textual criticism and editing that are inflected by our advance into the digital era structurally analyses arts of composition in literature and music and traces the cultural implications discernible in book design and in the canonisation of works of literature and their authors distinctive and ambitious these essays move beyond the concerns of the community of critics and scholars gabler responds innovatively to the issues involved and often endeavours to re think their urgencies by bringing together the orthodox tenets of different schools of textual criticism he moves between a variety of topics ranging from fresh genetic approaches to the work of james joyce and virginia woolf to significant contributions to the theorisation of scholarly editing in

the digital age written in gabler s fluent style these rich and elegant compositions are essential reading for literary and textual critics scholarly editors readers of james joyce new modernism specialists and all those interested in textual scholarship and digital editing under the umbrella of digital humanities

this is the first nursing book on cancer care designed around a conceptual model of whole person care key concepts are stress healing resilience and health as a clinical model nursing goals desired outcomes key concepts and proposed psychosocial interventions with patients and family caregivers advance the practice of clinical nursing toward a more comprehensive understanding of the whole person with cancer and their loved ones as a model for teaching nursing students about chronic illness it provides a scientific basis for students to learn how to assess and care for the whole person and his loved one as a model for clinical research in the field of cancer care it serves as a predicate for the development evaluation and interpretation of clinical interventions the model is a dynamic framework that both informs and is informed by research findings it is hoped that future research findings will reveal the optimal combination of interventions to provide comprehensive care across clinical contexts with a patient centred humanistic focus anchored by the quality of the nurse patient and family caregiver relationships it is hoped that the nurse s technical procedural and medical expertise may complement rather than define the nurse s approach to the whole patient and family the book is structured to facilitate the reader s easy access to needed information each chapter examines a key concept of the model and is organized around an introduction learning objectives definitions and relevant research findings that serve as the scientific predicate for suggested interventions discussed in part 4 nursing approaches clinical and personal anecdotes tables and figures illustrate the concepts under discussion nurse practitioners clinic nurse specialists nursing professors graduate students and

nurse researchers may find this book a useful reference for conceptualizing whole person care and for determining relevant interventions that promote healing resilience and health but it is also relevant for family doctors and fourth year students learning to care for the whole person with a chronic illness
